

We can help to

Evaluate forecasts

- ∅ What are we trying to achieve?
- ∅ How will we know afterwards whether we made good forecasts?
- ∅ What mathematical properties do good forecasts have?

CATS researchers have collaborated with many partners to improve their use of forecasts including the RNLI, EDF, Norwegian national parks, the UK Department for Energy and Climate Change, Lloyd's of London, the Start Network, and others.

Leonard Smith (2016) 'Integrating information, misinformation and desire: improved weather-risk management for the energy sector', 289-296
