

Model Error, Real World Risk: Probabilistic Pathways but Probably not Probabilities

Leonard Smith

Risk in the 21st Century, Oxford 18 10 01 282 485 10118 013010 0118 013010 0118 013010 0118 013010

-relevant information? And how is that information best expressed?

While attempts to attack the problems discussed may prove rather technical, this talk will aim to pose the central difficulties in an intuitive, nontechnical way, without masking the fundamental difficulties involved.
