

Dr Will Venters

Academic Career Progression

Recent Research Activities

(2010 -2011) Co-Principle Investigator - Physical Science Information Practices. Funded by Research Information Network. Physical sciences, hunting for the exploration of fundamental

development and allied fields. The project makes use of modelling approaches (problem structuring methods) to interpret the different understandings of key issues (including the varied meanings of sustainability itself), and uses these methods to explore the set of key elements

jointly taught).

-

- Invited lecture, 16th GridPP collaboration meeting, QMUL (2006).
- Invited lecture, University of Manchester (2004).
- Invited lecture, Information Systems Institute, University of Salford (2004).
- Invited panel chair in plenary at Second Annual Higher Education and Community
