Response to Draft Council of Europe [Guide on Human Rights for Internet Users](#)

Comments prepared by Brian O'Neill, Sonia Living ([genia@k7.org](#)) re f 84.0.-275 O TD -.

General Comments

EU Kids Online is a European project funded by the European Commission. It aims to promote children's rights and safety online. The project involves research, advocacy, and capacity building across Europe.

The project has developed a comprehensive guide on human rights for internet users, which provides practical advice and recommendations for protecting children's rights online. The guide covers various aspects of children's online experiences, including privacy, data protection, and digital literacy. It also highlights the importance of involving children and young people in decision-making processes related to their online safety and rights.

The project offers a range of resources and services to support children and young people in Europe, including training programs, research reports, and advocacy materials. It also collaborates with international organizations such as the European Committee of Social Rights (ECSR) and the International Telecommunication Union (ITU) to promote children's rights online at the global level.
