Uses and activities online

- f Use is now thoroughly embedded in children's daily lives: 93% of 9-16 year old users go online at least weekly (60% go online everyday or almost every day).
- f Children are going online at ever younger ages -

- f 12% of European 9-16 year olds say that they have been bothered or upset by something on the internet. This includes 9% of 9-10 year olds. However, most children do not report being bothered or upset by going online.
- f Risks are not necessarily experienced by children as upsetting or harmful. For example, seeing sexual images and receiving sexual messages online are encountered by one in eight children but they are generally not experienced as harmful except by a few of the children who are exposed to them.
- *f* **By contrast, being bullied online** by receiving nasty or hurtful messages is relatively uncommon, experienced by one in twenty children, but it is the risk most likely to upset children.
- *f* Further, only 1 in 12 children have met an online contact offline, and also this risk rarely has a harmful consequence, according to children.
- f Boys, especially teenagers, are more exposed to sexual images online, while teenage girls are slightly more likely to receive nasty or hurtful messages online. However, girls are generally more likely to be upset by the risks they experience.
- f The survey asked about a range of risks, as detailed below. Looking across all these risks, 41% of European 9-16 year olds have encountered one or more of these risks.
- *f* **Risks increase with age**: 14% of 9-10 year olds have encountered one or more of the risks asked about, rising to 33% of 11-12 year olds, 49% of 13-14 year olds and 63% of 15-16 year olds.

Pornography

f 14% of 9-16 year olds have in the past 12 months seen images online that are *"obviously sexual –*

Meeting online contacts offline

f The most common risky activity reported by children online is communicating with new people not met face-to-face. 30% of European children aged 9-16 who use the internet have communicated in the past with someone they have not met face-to-

f Both children and parents consider parental mediation helpful, especially 9-12 year olds.
