Just a few companies in the world can make technology at that level. That's deeply intriguing, but also concerning. ”

### Supply-chain constraints

Disruption at any of these stages would cause issues; however, Dr Peters finds that

“When we trace the process back, we start to see how difficult and constrained the

### Who holds the power in the AI era?

“There are manufacturing capacities that make operations difficult to scale up, so making the chips would also create delay. But our findings also raise questions of
